

The wolf isn't myth or symbol. **IT'S FACT.**

WOLVES shouldn't be treated as bloodthirsty devils or nature's crowning achievement. They should be treated as what they are—valuable, native wildlife. Wolves bring \$35 million into the Yellowstone region annually. They improve the health of elk herds and habitat. In polls, most residents say wolves are an important part of life in the West. It's time we see that wolves belong here, same as elk, bears, you and me.
